Describe your symptoms: _____

Initial Onset Date: _____ How did your symptoms begin? _____

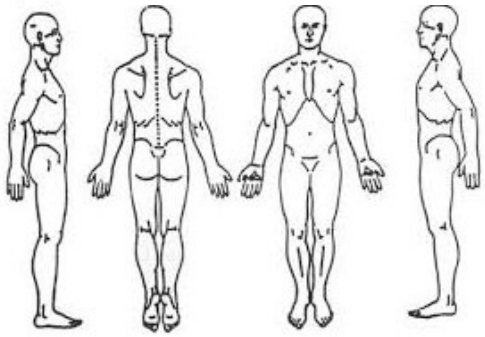
How often do you experience your symptoms?
① Constantly (76-100% of the day)
② Frequently (51-75% of the day)
③ Occasionally (26-50% of the day)
④ Intermittently (0-25% of the day)

How are your symptoms changing?
① Getting better ② Not changing ③ Getting worse

How much have you symptoms interfered with your usual daily activities?
① Not at all ② A little bit ③ Moderately ④Quite a bit ⑤ Extremely

In general, would you say your overall health right now is…
① Excellent ② Very Good ③ Good ④ Fair ⑤ Poor

Indicate where you have symptoms



Average Pain Intensity

Orthopedic Rehabilitation Associates Cancellation/No Show Policy

And

Notice of Privacy Practices

The Staff at Orthopedic Rehabilitation Assocaites work hard to provide quality care and to give each patient the time required for their condition. We offer early morning and evening hours for those whose schedules do not allow treatment during the day.

As our business grows, it becomes increasingly important that we continue to offer treatment time slots that are as convenient as possible to our patients. It is equally important that if you wish to cancel or reschedule an appointment that we receive at least 24 hours notice so that we can call and schedule patients from our waiting list. We do realize that scheduling conflicts and emergency situations occasionally arise and we will do our best to excuse these special circumstances.

A $50 Cancellation/NO Show Fee will be charged to your directly. These fees cannot be billed to insurance.

A voice message on our phone is an acceptable means to communicate a cancellation within 24 hours of your scheduled appointment.

Thank you in advance for your consideration.

I have read and understand Orthopedic Rehabilitation Associates Cancellation/No Show Policy

Dry Needling Consent & Information Form

What is dry needling?

Dry needling is a form of therapy in which fine needles are inserted into myofascial trigger points (painful knots in muscles), tendons, and ligaments or near nerves in order to stimulate a healing response in painful musculoskeletal conditions. Dry needling is not acupuncture. It does not have the purpose of altering the flow of energy (Qi) along meridians as in traditional Chinese medicine. Dry needling is a modern science-based intervention for the treatment of pain and dysfunction in musculoskeletal conditions.

Is dry needling safe?

Drowsiness, tiredness or dizziness occurs after treatment in a small number of patients (1-3%) and if affected you are advised not to drive. Minor bleeding or bruising occurs after dry needling in 15-20% of treatments and is considered normal. Temporary pain during dry needling occurs in 60-70% of treatments. Existing symptoms can get worse after treatment for some patients (13%); however, this is not necessarily a "bad" sign. Fainting can occur in about 0.3% of patients, with increased incidence following the first treatment session in the head or neck region.

Dry needling is very safe. However, serious side effects can occur in less than can occur in less than 1 per 10,000 treatments (0.01%). The most common serious side effect from dry needling is pneumothorax (lung collapse due to air inside the chest wall). The symptoms of pneumothorax induced by dry needling commonly do not occur until after the treatment session, sometimes taking several hours to develop. The signs and symptoms of pneumothorax may include shortness of breath on exertion, increased rate of breathing, chest pain, dry cough, bluish skin discoloration or excessive sweating. If such signs and/or symptoms occur, you should immediately contact you physical therapist or physician. It is also possible that nerves or blood vessels may be damaged during dry needling which can result in pain, numbness or tingling. This is a rare event and is usually temporary. In addition, damage to internal organs has been reported in the medical literature following dry needling but this is also very rare (1 in 200,000).

Is there anything your physical therapist needs to know?

- Have you ever fainted or experienced a seizure? YES / NO
- Do you have a pacemaker or other electrical implants? YES / NO
- Are you currently taking anticoagulants (examples-Aspirin, Warfarin, Coumadin)? YES / NO
- Are you currently taking antibiotics for an infection? YES / NO
- Are you at increased risk of infection? YES / NO
- Are you pregnant or actively trying to become pregnant? YES / NO
- Do you have allergies to metals or latex? YES / NO
- Do you have diabetes or impaired wound healing? YES / NO
- Do you have hepatitis B, hepatitis C, HIV or any other blood borne pathogens? YES / NO
- Do you have any silicone or saline implants? YES / NO
- Have you eaten today? YES / NO

Single-use, disposal needles are used at this clinic

STATEMENT OF CONSENT

I confirm that I have read and understand the above information and I consent to having dry needling treatments. I understand that I can refuse treatment at any time.
